PROFILE

Software Engineer with 5+ years of experience across frontend and backend development, specializing in React, TypeScript and C#/.NET. Experienced in building software from the ground up and making key technical decisions, modernizing legacy applications, building backend services, and establishing development practices that ensure consistent code quality. Currently completing a **Master 2 in International Business Engineering** and interested in product-focused engineering and enterprise architecture. Seeking a **CDI/CDD or internship (stage)** in France from February 2027, ideally remote or with limited on-site presence.

PROFESSIONAL EXPERIENCE (5+ YEARS)

Senior Software Engineer / Full-Stack Developer | LLP ABR Tech

Feb 2024 - Aug 2025 full-time | on-site; Sep 2025 - present part-time | Almaty, Kazakhstan | hybrid/remote

- Set up an Nx monorepo for ~10 web applications, introducing shared libraries and consistent tooling to reduce duplication and simplify maintenance across products.
- Built 3 web applications from scratch and brought them to production; selected Astro for a lightweight, fast landing page and React/PWA for an internal dashboard requiring fast loading and reliable use on poor networks.
- Adopted Vertical Slice or Feature-Sliced Design architecture depending on application size and complexity, keeping code organized around business features and maintaining clear module boundaries as applications grew.
- Turned team coding conventions into automated linting and pre-commit checks, reducing back-and-forth in code reviews and keeping standards consistent across the codebase.
- Developed REST APIs, admin functionality, and business logic with C#/.NET 9; worked with PostgreSQL and MongoDB.
- Built a reporting bot that processed application data and automated weekly updates, replacing a recurring manual workflow.

Mobile & Web Developer | NXT LVL PZA

Jul 2022 - Feb 2023 | London, UK | remote

- Delivered a React Native iOS ordering app with card payments and Apple Pay from initial development to production within 4 months, working in a fast-moving startup environment with rapid iterations and frequent releases.
- Chose a React-based, mobile-first approach to enable fast expansion beyond iOS, reusing and adapting the codebase to deliver a React/Next.js web app in 1 month.
- Built native mobile integrations, including camera events, and implemented WebSocket communication for real-time application updates.

Software Developer | LLP Bass Technology

Jul 2020 - Jul 2022 | Almaty, Kazakhstan | on-site

- Modernized ~80% of a legacy JavaScript application in React and TypeScript, simplifying future development and significantly reducing the time required to deliver new features and changes.
- Built core functionality for a production queue management platform, implementing polling-based real-time monitoring of queues.

TECHNICAL SKILLS

Frontend & Mobile: React, TypeScript, JavaScript, React Native, Next.js, Vite, Webpack, Redux Toolkit, TanStack Query/Router, SSR, PWA, WebSockets, Authentication / authorization / Single Sign-On

Architecture: Frontend architecture, Feature-Sliced Design, Vertical Slice Architecture, Nx Monorepos, Performance Optimization

UI & Product Interfaces: Tailwind CSS, Radix UI, Material UI, Styled Components, SCSS/SASS, Bootstrap, Motion, Recharts, responsive design

Libraries & Integrations: React Hook Form, Zod, i18next, dnd-kit, Mobiscroll, date-fns, Axios, XLSX, Google Maps API, reCAPTCHA, Video.js

Backend & Data: C#, .NET 9, REST API design & integration, PostgreSQL, MongoDB

Testing & Code Quality: Jest, React Testing Library, unit/integration testing, ESLint, Husky, Prettier, GitHub/GitLab code review

Delivery & Workflow: Git, GitHub, GitLab, GitHub Actions, CI/CD, Docker, Agile/Scrum, Kanban

Technical Communication: Can break down complex technical problems into simple, clear explanations that anyone can understand.

SELECTED PROJECT

Problem: For an internal restaurant dashboard, every new report for marketing, delivery, and management required Data Analytics to prepare data, Backend to build an API, and Frontend to implement the UI. **My contribution:** Built a configurable frontend system that transformed raw data into calculated metrics, tables, Recharts visualizations, and reusable widgets for role-specific dashboards. **Architecture & result:** SQL queries (restricted access) + frontend data transformation, enabling one-time Analytics setup while keeping sensitive data access role-based.

EDUCATION

KU Leuven - Faculty of Economics and Business | Brussels, Belgium

Exchange Studies | Sep 2026 - Jan 2027 | ICT Strategy and Architecture, Data Science for Finance

Master's in International Business Engineering | IAE Montpellier, France

Sep 2025 - Aug 2027 | Rang 4/41 | Financial Accounting, International Finance and Exchange Markets, Information Systems

BSc Computer Science | University of Central Asia, Kyrgyzstan | Sep 2018 - Jul 2022 | Magna cum laude

LANGUAGES English - C1 | French – B2 (on my way to C1) | Kazakh – Native | Russian - Native/Fluent
